CAREER OBJECTIVE

Web developer with a proven ability to adapt in both self-starting and collaborative environments while staying focused on achieving high quality results. Eager to obtain a challenging position at a prestigious company that will expand my learning and build upon my developer skills.

PROJECTS

FoodApp — <https://github.com/danielasakpa/Food-website>

The food ordering & delivery application is designed based on a real-life scenario. With a payment gateway integration.

Built with: JavaScript, CSS, MUI, AOS, Node.js, Express.js, EJS and MongoDB.

BlogApp — <https://vast-coast-06462.herokuapp.com/>

lets users write blog entries once they sign up with an account, After the user registers and dynamically shows different pages depending on the user being logged in or out.

Built with: HTML, CSS, JavaScript, Node.js, Express.js, EJS and MongoDB.

portfolio — <https://github.com/danielasakpa/Portfolio-2>

My personal portfolio used to host my projects.

Built with: JavaScript, React.js and Material UI..

RELEVANT COURSES

Web Development/ The App Brewery, Location — Degree

Jan 2022 - April 2022

Took this course at the beginning of this year; to be precise (took too long, right? 😊). It was quite exhilarating and challenging learning to build stuff that actually served a purpose. We worked with HTML, CSS, Javascript, Node, React, MongoDB, Web3 and DApps.

SKILLS

Languages: JavaScript (ES6) | C# | HTML & HTML5 | CSS & CSS3

Libraries and Frameworks: React | Node.js | Express.js | Git & GitHub | Material ui

Database: MongoDB |
Mongoose

Design: Figma

EDUCATION

GraceLand ville,
Location — High school
diploma(Waec)

Jun 2014 - Aug 2020

I used all of my high school years at Graceland and learned a lot during my time there.

LANGUAGES

English.
